Eponyms in Surgery and Anatomy of the Liver, Bile Ducts and Pancreas

By Mark D Stringer

£35.00 - 978-1-85315-985-5 - 208pp
Paperback - September 2009

Meticulously researched, and beautifully illustrated with more than 150 photographs, *Eponyms in Surgery and Anatomy of the Liver, Bile Ducts and Pancreas* is aimed at surgeons, physicians and anatomists, and is sure to enrich the reader's historical perspective of this fascinating branch of surgery and anatomy.

For those involved in the management and study of disorders of the liver, bile ducts and pancreas, eponyms are part of everyday communication. They help to describe anatomical features, operative procedures, surgical instruments, and diseases. Unfortunately, many have become distorted or are inaccurately applied. Few of us understand their derivation or the remarkable people and controversies behind them.

This book explores the origins of seventy eponyms in the field of hepatobiliary and pancreatic surgery and anatomy. The lively text takes us from Abernethy to Wirsüng with such notable characters as Calot, Couinaud, Hartmann, Langerhans, Mirizzi, Oddi, Pringle, Roux, Vater and Winslow along the way. Each section is deliberately short and intended for quick reference, providing accurate information about the origin of the eponym and the figure behind it.
